A Life Devoted to Classical Chinese Poetry

CGTN

Considered one of the most influential literature scholars of recent times, 98-year-old Yeh Chia-ying (叶嘉莹) is committed to ongoing classical Chinese poetry research and teaching in China and beyond.

Born to a literary family in Beijing in 1924, Yeh Chia-ying began to recite ancient poems at the age of three. Poetry has since then become an inseparable part of her rather turbulent life. In 1976, her eldest daughter died in a car accident. Yeh healed her pain with poetry. She coined the phrase “beauty of passive virtue” to illustrate her life philosophy. She said, “Passive virtue does not mean that you are always weak. The power to endure weakness and persist in it is passive virtue.”

Yeh Chia-ying graduated from Fu Jen Catholic University in 1945. She was a visiting professor at Harvard and Columbia universities, as well as a lifetime professor of the University of British Columbia. She is also the only fellow of Chinese classical literature at the Royal Society of Canada. During her years abroad, Yeh Chia-ying longed to return to her homeland. In 1974, she finally managed to fly back to Beijing.

In 2015, Nankai University set up an academy called “Jialing School,” named after Yeh. This year, she officially ended her decades of living abroad and settled in Nankai. From 2018 to 2019, Yeh donated a total of 35.68 million yuan from her savings and properties to establish the “Jialing Fund” to support the study of traditional Chinese culture. The annual Jialing Cup Poetry Analysis Competition was launched in 2019 to encourage the reading and studying of classical poetry.

Yeh is a recipient of the You Bring Charm to the World Award, Award for Outstanding Contributions to China Studies, and Touching China's 2020 Person of the Year. Fame and fortune have not altered her true heart. "I don't know how many more years I will live. Death could be imminent. I teach people to recite poetry because I think it should be passed down. I'm devoting the rest of my life to poetry," Yeh Chia-ying shared.

Group work: Work in groups and discuss the following questions:

- 1 Which part of Yeh's life stories touches you the most?
- 2 What inspirations can you draw from Yeh's devotion to classical Chinese poetry?

Pair work: Created in 2003, the annual (年度的) “Touching China” award honors people who have inspired the country over the past year. Look at the two columns below. Then work with your partner and match the names (all are winners from 2019 to 2021) in Column A with the deeds in Column B. As you go through the exercise, underline words and phrases new to you.

Watch the video clip and discuss the following questions with your classmates.

1 The Mogao Caves are known as “the Pearl of Oriental Art”. What do you know about this great cultural heritage?

2 What were the living conditions like while Fan Jinshi did her research in the desert in the 1960s?

3 What efforts did Fan Jinshi make to permanently preserve the cultural relics inside the Mogao Caves?

4 Fan Jinshi devoted her entire life to Dunhuang. Her dedication and persistence have been an inspiration to many. How have you been inspired by her story?

UNESCO World Heritage site

On the basis of the Convention concerning the *Protection of the World Cultural and Natural Heritage* (1972), UNESCO has been building a list of cultural and natural heritage sites around the world to encourage their protection and preservation. The Mogao Caves were inscribed on the World Heritage List in 1987.

联合国教科文组织依据《保护世界文化和自然遗产公约》（1972年）编订世界文化和自然遗产名单，鼓励各国加强保护。莫高窟于1987年入选。

The Digital Dunhuang project

The Dunhuang Academy is pursuing overall digitization of the Mogao Caves and related cultural relics through this project, spanning collection, processing and storage. The goal is to build a digital repository integrating photos, videos, 3D data, literature, etc., that can be shared globally over the internet.

敦煌研究院通过该项目对莫高窟及相关文物在收集、整理和储存等方面进行全面数字化处理。其目标是建立一个集照片、视频、三维数据、文献等为一体的数字资源库，并可通过互联网全球共享。

TEXT

Making a name for himself as a successful artist in Paris, Chang Shuhong abandoned (放弃) it all when he chanced upon (偶遇) a book on the Mogao Caves that inspired him to return to China to become one of a line of their guardians. It is a line that came to include the renowned Fan Jinshi, widely known as “the daughter of Dunhuang” for her efforts on behalf of the caves.

Guardians of Dunhuang

Aaron Hsueh

1 “My **inner** voice tells me to stay here, perhaps forever,” **distinguished** linguist and Buddhism researcher Ji Xianlin **wrote of** the Mogao Caves in his book *The Journey to Dunhuang*. “Though my body must leave, my heart belongs to Dunhuang forever.”

2 Ji was not the first or the last to be **fascinated** by the Mogao Caves, now listed as a UNESCO World **Heritage** site. **Located** at a strategic point along the Silk Road in Gansu province, **carved into the cliffs, the 735 caves house colored statues, frescos, and Buddhist scriptures.** They were first built by monks in the year 366. As time **went by**, the site became a gathering place for worshippers, traders and other travelers, but it **declined** after the Yuan dynasty and **sank into** oblivion. It was not until the early 20th century that the caves were rediscovered. Since then, they have again attracted people’s attention, with a number of famous scholars and painters visiting the caves to

study them. Some have even devoted their lives to protecting the cave art and keeping it alive. Among them, Chang Shuhong and Fan Jinshi **stand out** as two shining examples of such **passionate commitment**.

T

3 As an aspiring young man, Chang Shuhong attended top art schools in France and was **making a name for himself** there by winning numerous **awards** for his oil paintings in the 1920s and 30s. But all this was soon to change, after he **came across** a book on the Dunhuang caves. Chang was amazed to discover that China had such a long-hidden treasure house of art. For him, this was a moment when he felt an immediate connection with Dunhuang.

T

4 Chang returned to China and helped set up a research institute to study the Dunhuang cave art. In 1943, he and his team arrived at Dunhuang, only to find that **they were short of** funds and that the conditions were beyond description. They

had to work in a temple, living in a stable, drinking salty, muddy water, and eating rock-hard pancakes and plain noodles. However, Chang wrote to his wife, “All the suffering is worth it! Yes! At first glance, I said to myself, I’ll be happy to die here.” Over the years, he and his colleagues searched for cultural **relics**, copied frescos, and numbered caves, thus systematically and meticulously studying and protecting the treasures of Dunhuang.

 **T** 5 **Following in Chang’s footsteps** came Fan Jinshi, widely known as “the daughter of Dunhuang” for **dedicating** her whole life to the cause of protecting the caves. Her admirable work has earned her several national **titles**, including the “100 people who touched China” award and the “outstanding contributor to the cultural heritage **preservation**” award. Born in Beijing but **brought up** in Shanghai, Fan graduated from Peking University with an archeology degree and first came to Dunhuang on an internship in 1963. “To say I didn’t **hesitate** to stay is a lie. Dunhuang

is a different world from Beijing and Shanghai,” Fan admitted. However, she was completely **overcome** by the beauty of the ancient artworks.

T

6 Fan did much of her research without electricity until the 1980s, when conditions improved slightly. Through her painstaking work, she was able to date the various caves and their construction by dynasty. Later, as vice-president, then president of the Dunhuang Academy, Fan **took charge of** site planning, scientific research, environmental monitoring and **control**, and visitor **management**. She saw challenges to protecting the **site**, when quickening **erosion** and **over-tourism** became serious **threats**. “Frescos can’t be remade; neither can they be preserved forever,” Fan said, as she **pushed** herself to be innovative in **digital** preservation and **sustainable** use of the relics. A tourist center is **now in place** to welcome visitors and **ease** pressure on the caves. Fan also **launched** the Digital Dunhuang **project** to build a database of

all the statues and frescos, using state-of-the-art technology. “Despite our efforts to reduce damage, we can’t completely stop them from being eroded. But the digital database will last,” she said.

  7 Indeed, thanks to the lifelong **devotion** and personal sacrifices of these Guardians — Chang Shuhong, Fan Jinshi and their colleagues — the Mogao Caves will be able to continue astonishing the world far into the future.

2. Comprehension Check

Pair work: With the teacher as guide, you and your partner work on the following comprehension check exercises.

2.1 Focusing on the main ideas

Complete the following paragraph with key information from the text.

There is something very special about the Mogao Caves. Visitors find it hard to leave once they arrive. Even if their body has to leave, their heart stays. Some have been so hooked that they put down roots (扎根) and built a fruitful life keeping the cave art alive. Chang Shuhong was one. He helped put the site back on the map by opening up caves that had long sunk into oblivion, numbering them, copying the frescos and publishing papers on this treasure house of art. Fan Jinshi followed in his footsteps.

She busied herself with not only research, but also management. The Digital Dunhuang project she launched, aside from its academic value, allows visitors to experience caves they wouldn't set foot in, therefore balancing tourism with sustainable use of cultural relics. For their devotion and personal sacrifices, Chang, Fan and their colleagues have won widespread admiration.

2.2 Digging into detail

Answer the following questions to better understand the text. You may want to write down some key words in the space provided before you do so.

🔑 (Para. 1) 1 Ji Xianlin used a word similar in meaning to “inner voice.” What is it?

Heart.

🔑 (Para. 2) 2 When did the construction of the Mogao Caves start? When were the caves rediscovered?

In the year 366. In the early 20th century.

🔑 (Para. 3) 3 How did Chang Shuhong feel when he came across a book on the Dunhuang Caves?

He felt an immediate connection with Dunhuang.

🔑 (Para. 4) 4 What were the challenges facing Chang and his team in 1943?

They were short of funds and the conditions were very bad.

🔑 (Para. 5) 5 Why did Fan Jinshi stay at Dunhuang despite the poor conditions there?

She was overcome by the beauty of the ancient works.

🔑 (Para. 6) 6 What were the two serious threats to the protection of the Mogao Caves?

Quickening erosion and over-tourism.

2.3 Understanding difficult sentences

Choose the answer that correctly interprets the sentence from the text.

 **1** Located at a strategic point along the Silk Road in Gansu province, carved into the cliffs, the 735 caves house colored statues, frescos, and Buddhist scriptures. (*Para. 2*)

- ☐ A) Because of their strategic importance to the Silk Road, the 735 caves were carved into the cliffs in Gansu province, housing colored statues, frescos, and Buddhist scriptures.
- ☒ B) The 735 caves housing colored statues, frescos, and Buddhist scriptures were carved into the cliffs at a strategic place along the Silk Road in Gansu province.

 **2** As an aspiring young man, Chang Shuhong attended top art schools in France and was making a name for himself there by winning numerous awards for his oil paintings in the 1920s and 30s.

(Para. 3)

- ☒ A) When Chang Shuhong studied art in France in the 1920s and 30s, he had big dreams and became quite famous after winning awards for his oil paintings.
- ☐ B) As a young man studying art in France in the 1920s and 30s, Chang Shuhong wanted very much to win awards for his oil paintings and make a name for himself.

 **3** To say I didn't hesitate to stay is a lie. Dunhuang is a different world from Beijing and Shanghai. (*Para. 5*)

- ☒ A) I did hesitate over staying at Dunhuang. It can't compare with Beijing and Shanghai.
- ☐ B) I lied about my stay at Dunhuang. This is a new world compared with Beijing and Shanghai.

 **4** Despite our efforts to reduce damage, we can't completely stop them from being eroded. But the digital database will last. (*Para. 6*)

- ☐ A) Although we try our best, erosion still takes place, but the digital database will be the last to be eroded.
- ☒ B) Although we try our best, erosion still takes place. But there won't be any erosion to the digital database.

Write Informatively

This text introduces people who have devoted their lives to studying and preserving the Mogao Caves. It contains a large amount of information that needs to be presented in a clear, effective and engaging way. The author employs a variety of techniques to achieve this purpose.

First, the text starts with a quote from a celebrated Chinese scholar of Buddhism, who describes the powerful attraction of the Mogao Caves. The quote serves to spark the reader's curiosity right at the beginning. It seems interesting to find out what is special about the caves, to which the scholar was emotionally connected.

Second, the text is tightly knitted to achieve logical coherence, making it straightforward and easy to follow. The

introduction of the Mogao Caves sets up the context to prepare the reader with the knowledge of their history and significance. The quote at the beginning, the history of the caves, and the dedication of Chang Shuhong and Fan Jinshi are connected by the theme of emotional and personal connection to the Mogao Caves. The use of transitional phrases and sentences helps to smoothly connect ideas and information between the different parts of the text:

- Ji was not the first or the last to be fascinated by the Mogao Caves ... (Para. 2)
- Since then, they have again attracted people's attention, with a number of famous scholars and painters visiting the caves to study them. (Para. 2)

- Among them, ... (Para. 2)
- Following in Chang's footsteps ... (Para. 5)
- thanks to the lifelong devotion and personal sacrifices of these Guardians (Para. 7)

Third, the concluding paragraph not only summarizes the entire text, but also moves from the personal experiences of the individuals involved to the importance of these caves far beyond them, with the emphasis on these people's enduring legacy for humanity. This helps the reader appreciate even more the work of the people who have made contributions to the preservation of the cultural treasure.

1 Ji Xianlin, Chang Shuhong and Fan Jinshi are outstanding representatives of many scholars who have dedicated their lives to preserving China's cultural heritage. Share with your classmates what you know about any other contributions they have made in terms of protecting cultural relics.

2 President Xi Jinping said, “We should appreciate the cultural significance of ancient relics rather than simply admiring their exquisiteness, and bring their inherent spirit to life instead of merely appreciating the artistic presentation of life in the past.”

What do you think is the value and significance of protecting traditional culture and cultural relics?

The history of China's success in building railroads can be traced back to the groundbreaking (开创性的) work of Zhan Tianyou, who established (确立) the ingenuity (聪明才智) of Chinese engineers in the eyes of the world.

Reading 1

🔊 Zhan Tianyou, Father of China's Railroad

Alex Colville

🔊 **T** 1 During the 2022 Winter Olympics, the Beijing-Zhangjiakou highspeed railroad drew world attention as bullet trains transported athletes and visitors between the two host cities. (1) While marveling at China's recent accomplishments in railroad construction and automation, those in the know can't help recalling Zhan Tianyou, Father of China's Railroad, under whose supervision the original Beijing-Zhangjiakou Railroad was completed in 1909. It was, of all the railroad lines in China, the first one built solely by Chinese without any assistance whatsoever from Western powers.

🔊 **T** 2 The earliest railroad lines in China were built by Western powers with an eye on carving up China. This plus the noisy steam trains created among the Chinese people a deep distrust of railroads. Few Chinese were interested in railroads, let alone learning how to build them. Zhan Tianyou thought differently.

🔊 **T 3** Zhan was a bright boy who was often seen studying and playing with clocks and ship models. He was selected by the Qing government in 1872 at the age of 12 to study Western technology in America. There he excelled in maths at high school and graduated at the age of 20 from Yale University as a Civil Engineering major with an emphasis on railroad construction. He saw railroads as the key to modernizing China. However, when he returned to China, there was no job for him in the railroad sector.

🔊 **T 4** It was not until seven years later that Zhan was recommended by a friend to work with a British engineer on the construction of a new railroad in northern China. He soon won recognition for his successes in several projects, including the Luanhe Iron Bridge, China's first railroad bridge.

🔊 **T** 5 Zhan Tianyou's greatest achievement was yet to come: the railroad linking Beijing with the important trading city of Kalgan (now Zhangjiakou). At first, two Western governments competed fiercely for the supervision of the project, but neither of them got the upper hand. In the end, they had to let the Chinese do it themselves. The railroad may have been only 201.2 kilometers in length, but it stretched across a mountainous terrain and passed under the Great Wall at Badaling. Before and even after his appointment as Chief Engineer of the project, many foreigners questioned Chinese engineers' ability to build a railroad in such a challenging environment. Zhan Tianyou was under tremendous pressure. "(2) If the Beijing-Zhangjiakou project turned out to be a failure, it would not only be my misfortune, but also the misfortune of all Chinese engineers and a great loss for China, because Chinese engineers would no longer be trusted," Zhan later wrote to his American teacher. However, he was determined to defy the odds and go ahead.

🔊 **T 6** To overcome the gradient problems of steep slopes, Zhan invented a zigzag upward railroad and employed two locomotives to drive a train in such areas with one pulling at one end and the other pushing at the opposite end. To speed up the construction of long tunnels, he had vertical shafts drilled in the middle and workers dig in opposite directions at the same time. (3) As it turned out, Zhan managed to complete the project in 1909, two years ahead of schedule on a fifth of the budget.

🔊 **T 7** Despite the increasing fame he was achieving, Zhan knew he was more comfortable being an engineer. He was a keen promoter of Chinese talent in railroad technology. When Zhan Tianyou was Director-General of the Guangzhou-Wuhan-Sichuan railroad line, a German chief engineer asked him if incompetent Chinese engineers could be replaced with German ones. Zhan replied that if the Chinese engineers were indeed incompetent, they could be replaced, but for the good of the country, they needed to learn railroad construction.

🔊 T 8 Zhan Tianyou died in 1919 at the age of 58. His final resting place was at Qinglongqiao Railway Station, where the Beijing-Zhangjiakou Railroad crossed under the Great Wall. By then his achievements had been recognized at home and abroad. He had been awarded membership of both prominent British and American engineering societies.

🔊 T 9 Compared with China's remarkable engineering feats today, Zhan's seems very small. Trains trudged 35 kilometers an hour on his Beijing-Zhangjiakou Railroad, whereas the bullet train today hits 350 kilometers. (4) But Zhan's career marked a first step — of Chinese people changing their perception, coming up with innovative ideas, going all out, and eventually putting the country on the fast track.

Decide whether the following statements are true (T) or false (F), based on the article.

- T 1 The earliest railroad lines in China were owned by Western powers.
- F 2 Zhan Tianyou worked in railroad construction in the US right after graduating from Yale University.
- F 3 A British engineer recommended Zhan Tianyou to the Qing government.
- T 4 The greatest achievement of Zhan Tianyou was building the first railroad in China without any foreign help.
- F 5 201.2 kilometers out of the entire length of the Beijing-Zhangjiakou railroad were in challenging mountainous areas.

- T 6 Foreign engineers doubted the ability of Chinese engineers before and during the construction of the Beijing-Zhangjiakou railroad.
- F 7 Zhan Tianyou saved a fifth of the budget upon completion of the Beijing-Zhangjiakou railroad.
- T 8 Zhan Tianyou wanted Chinese talents to learn about railroad construction for the good of the nation.
- F 9 Zhan Tianyou argued strongly with a German chief engineer over the firing of a Chinese engineer.
- F 10 Zhan Tianyou's achievement is small compared with China's engineering feats today.

Translate into Chinese the underlined sentences in the article.

- 🔑 1 While marveling at China's recent accomplishments in railroad construction and automation, those in the know can't help recalling Zhan Tianyou, Father of China's Railroad, under whose supervision the original Beijing-Zhangjiakou Railroad was completed in 1909.

了解情况的人在惊叹中国最近在铁路建设和自动化方面取得的成就同时，不禁想起中国铁路之父詹天佑。他主持修建的最早的京张铁路于1909年建成。

- 🔑 2 If the Beijing-Zhangjiakou project turned out to be a failure, it would not only be my misfortune, but also the misfortune of all Chinese engineers and a great loss for China, because Chinese engineers would no longer be trusted.

如果京张工程失败的话，不但是我的不幸、中国工程师的不幸，同时会给中国带来很大损失，因为中国工程师今后就不会再被信任了。

🔑 3 As it turned out, Zhan managed to complete the project in 1909, two years ahead of schedule on a fifth of the budget.

结果，詹天佑于1909年完成该项工程，工期提前两年，只用了五分之一的预算。

🔑 4 But Zhan's career marked a first step — of Chinese people changing their perception, coming up with innovative ideas, going all out, and eventually putting the country on the fast track.

但詹天佑的事业标志着中国人民迈出了第一步：改变观念，持续创新，全力以赴，并最终使国家走上发展快车道。

What do we expect of a good leader? Someone who can devise (设计) ways to improve our lives and persuade us to adopt (采纳) them; someone who can inspire us to work hard for the common good; someone quick to adapt to (适应) a changing world, seizing new opportunities. Xiazhuang Village was in luck when it found all this and more in Mao Xianglin.

On the Road to a Well-Off Life

Du Chao

  1 At the award ceremony of the 2020 “Touching China” Person of the Year, a man with a slightly stooped back but a **resolute** expression on his face stepped into the **limelight**. Eight days later, he was honored as a model **poverty** fighter at a grand gathering held in Beijing. The man was Mao Xianglin, 62, from Chongqing. He **took center stage** twice within a few days, but

he had remained an unsung hero for over two **decades**, when he led the folks in a poor, **isolated** village on a pathbreaking journey to a better life.

🔊 T 2 Xiazhuang Village, where Mao comes from, is located at the bottom of a valley, with cliffs hundreds of meters high on all sides. Life there was extremely hard.

🔊 T 3 Changes happened in 1997, when 38-year-old Mao **took up the post of** village head. He called a meeting and **proposed** building a road by themselves to link the area to the outside world. However, his suggestion met with disapproval. Mao tried hard to persuade the 400 villagers through **patience** and **sincerity**. Finally, the villagers **reached an agreement** to build the road with self-raised funds.

🔊 T 4 Later that year, around 100 villagers rolled up their **sleeves**. Led by Mao, in the daytime, they drilled holes, placed **explosives**, and carried rocks; at night, they slept in caves having a safety

rope around the waist with the other end tied to a big tree growing in a crack in the rocks. Year after year they kept working hard for seven years running. In March 2004, the two-meter-wide and eight-kilometer-long road, winding through cliffs, was completed. It's more than a road; it's a dream of shaking off poverty that began to come true.

  5 Then Mao began to think about what else could be done to create a better life for the villagers. After visiting nearby villages and seeking advice from agricultural experts, he encouraged the villagers to plant oranges, sesame, wheat, watermelon, and pumpkins. Young villagers even went further, selling their produce online. A new agricultural mode emerged, with fruits as the mainstay and multiple cash crops developing simultaneously. The village prospered in that manner over the years. The average yearly disposable income of the villagers topped 13,000 yuan per person in 2020, more than 40 times the amount before the construction of the road.

  **6** The situation kept improving. With funds from the local government, Mao led the villagers to **renovate** and widen the road. As a result, a new blueprint for **economic prosperity** has **unfolded** for the village. “We’ve tried three ways of developing local tourism,” said Mao. First, some houses have been renovated and turned into guesthouses for travelers. Second, a small museum has been built for visitors to learn about the spirit of self-reliance. Third, more **investment** has been made in fruit planting and fruit-picking tours can be arranged.

  **7** Mao has **fulfilled** his promise to the villagers. Under his leadership, a total of 96 **households** were lifted out of poverty. In Mao’s mind, a good life is in everyone’s own hands.

Skim the article and answer the following questions.

 **1** Why was Mao Xianglin honored twice within a few days?

He led the folks in a poor, isolated village on a pathbreaking journey to a better life./He lifted his isolated village out of poverty.

 **2** What was Mao's first project towards improving the life of villagers?

He persuaded villagers to build a road by themselves (with self-raised funds) to link the area to the outside world.

 **3** What was the new agricultural mode that emerged with Mao's encouragement?

Villagers planted fruits as mainstay while multiple cash crops were developed simultaneously. They also tried selling produce online.

 **4** How has Mao's village tried to develop local tourism?

First, some houses have been renovated and turned into guesthouses for travelers. Second, a small museum has been built for visitors to learn about the spirit of self-reliance. Third, more investment has been made in fruit planting and fruit-picking tours can be arranged.

Prosperity

Prosperity is the long-cherished dream of the Chinese nation. It begins with making the people escape poverty and become rich. By 2020, China had won a comprehensive victory in the fight against poverty and had made the greatest contribution to global poverty reduction. During years of hard battle, millions of cadres were sent to rural areas for this mission. Mao Xianglin is one of the ordinary grassroots officials who have made great sacrifices for the cause of poverty alleviation.

Pair work: Work with your partner to complete the following dialogue, using the words and phrases in brackets. Make changes or additions where necessary.

A: Did you watch the award ceremony of the 2020 “Touching China” Person of the Year?

B: Yes, I did. I was much moved by one of the winners, Mao Xianglin, head of a poor, 1) isolated village. Early in 1997, with patience and 2) sincerity, he managed to persuade the villagers to self-fund a road to the outside world. They 3) rolled up their sleeves and worked hard for seven years, and finally completed a road winding through cliffs. This is not an ordinary road, but a dream for villagers to 4) shake off poverty. (isolate, roll up one's sleeves, shake off, sincerity)

A: I admire him so much. He really deserves the honor.

B: Yes. He has multiple shining qualities, and I think two stand out: one is commitment; the other is perseverance.

A: I feel the same way. The villagers dreamed of a 5) well-off life, but they had no idea how to make it. Mao 6) committed himself to the mission, and led them on a journey to a better life. He is a model 7) poverty fighter, a true hero. (commit, poverty, well-off)

- B:** He's really admirable. For more than 20 years, he has persevered and worked hard to lead the villagers out of poverty and toward prosperity. His commitment and perseverance eventually paid off.
- A:** Prosperity is the common wish of people. To achieve this goal, we must rely on our own hard work, and scientific methods as well.
- B:** Yes. Mao knows that wisely. He designed the 8) blueprint of economic prosperity for the village. He built the road first, then 9) renovated and widened it. He established a new agricultural 10) mode, planting fruits and a variety of cash crops. He initiated local tourism and attracted 11) investment from outside. Finally, the villagers' income increased significantly, and the village once in poverty 12) prospered.
(blueprint, investment, mode, prosper, renovate)

B: That's amazing! Their stories prove again that happiness is achieved through hard work.

A: I agree! Their dreams of prosperity came true. When individuals realize our personal dreams, together we will push the realization of the great Chinese Dream.

Surrounded by thousand-meter cliffs on all sides, nearly 400 villagers lived at the bottom of a valley in the deep mountains of Chongqing. Life was hard for people in the 1) isolated Xiazhuang Village back in 1997, when their annual income averaged only approximately 300 yuan with no convenient access to the outside world.

Mao Xianglin, head of the village then, was 2) resolute to

carve a road out of the cliffs and seek a way for villagers to escape 3) poverty. However, the construction work was way more difficult than they had imagined. The workers tied ropes around their 4) waists and dangled from the cliff, using hammers and drills to clear obstacles. Despite the risks and hardships, the villagers overcame challenges with their determination and their expectation for a better life.

After seven years of hard efforts, people in Xiazhuang Village finally completed the road linking the outside world. It is more than a road; it is a pathway to 5) prosperity. It enables

The whole village has shaken off poverty in 2015. By the end of 2019, a total of 96 6) households had been lifted out of poverty. The 7) per capita disposable income of the villagers topped 13,000 yuan in 2020, more than 40 times the 8) amount before the construction of the road.

Mao Xianglin has devoted his life over the past two 9) decades to the cause of poverty alleviation. He has 10) fulfilled his duty. He is a hero that has touched numerous Chinese people.

2. Translate the following passage into English.

从20世纪中叶到21世纪中叶的一百年间，中国人民的一切奋斗，都是为了实现祖国的富强、人民的富裕和民族的伟大复兴。消除贫困、改善民生、逐步实现共同富裕，是社会主义的本质要求，是我们党的重要使命。

In a hundred years from the mid-20th to the mid-21st century, all the struggles of the Chinese people have been aiming at making the country strong and prosperous, enriching the people and rejuvenating the nation. Eliminating poverty, improving living standards and achieving common prosperity are the basic requirements of socialism and an important mission of the CPC.

党中央把脱贫攻坚摆在治国理政突出位置，团结带领全党全国各族人民进行了8年的持续奋斗。2020年我们完成了消除绝对贫困的艰巨任务，取得了脱贫攻坚战的全面胜利，所有贫困地区和贫困人口同全国一道迈入了全面小康社会。

The Central Committee has placed poverty alleviation in a prominent position in governance, and has united and led the whole Party and the people of all China's ethnic groups in an eight-year sustained struggle. By 2020, we had completed the arduous task of eradicating absolute poverty, and had won a comprehensive victory in the battle against poverty. All poverty-stricken areas and individuals have entered the moderately prosperous society in all respects together with the rest of the country.

The People's Wish for a Good Life Is Our Goal*

November 15, 2012

T 1 Ours is a great nation. Throughout 5,000 years of development, the Chinese nation has made a contribution to the progress of civilization. Since the dawn of modern times, our nation has gone through untold **tribulations** and faced its greatest **perils**. Countless people with **lofty** ideals rose up for the rejuvenation of the nation, but each time they failed. After it was founded in 1949, the CPC **rallied** and led the Chinese people in making great sacrifices, **forging ahead** against all odds, and transforming China into an increasingly prosperous and powerful country, thus opening completely new horizons for national rejuvenation.

peril ['perɪl]
n. 危险

tribulation [ˌtrɪbjʊˈleɪʃən]
n. 苦难, 艰辛

lofty ['lɒftɪ]
a. 崇高的, 高尚的

rally ['ræli]
vt. 团结

forge ahead [fɔːdʒ]
取得进展, (尤指) 突飞猛进

T 2 Our responsibility is to rally and lead the entire Party and the people of all China's ethnic groups in taking on this task

* Part of the speech at the press conference by members of the Standing Committee of the Political Bureau of the 18th CPC Central Committee.

and continuing to pursue the goal of the rejuvenation of the Chinese nation, so that China can stand firmer and stronger among the world's nations, and make a new and greater contribution to mankind.

- T 3** We are taking on this important responsibility for the people. Our people are a great people. During the long history the Chinese people have worked with diligence, bravery and wisdom, creating a beautiful homeland where all ethnic groups live in harmony, developing a great and dynamic culture. Our people have an **ardent** love for life. They want to have better education, more stable jobs, more income, reliable social security, better medical and health care, improved housing conditions and a beautiful environment. They hope that their children will have sound growth, good jobs and more enjoyable lives. The people's wish for a happy life is our mission. A happy life comes from hard work. Our responsibility

ardent ['ɑːdənt]
a. 热烈的

is to bring together and lead the whole Party and the people of all ethnic groups to free their minds, courageously opening up, further **unfetter** and develop the productive forces, solve the people's problems in work and life, and **resolutely** pursue common prosperity.

resolutely ['rezəlu:tli]
ad. 坚决地

unfetter [ˌʌn'fetə(r)]
vt. 使自由；解放

T 4 The people are the creators of history. They are the real heroes and the source of our strength. We are fully aware that the capability of any individual is limited, but as long as we unite as one like a **fortress**, there is no difficulty we cannot overcome. One can only work for a limited time, but there is no limit to the people's strength. Our responsibility is heavier than mountains, our task **arduous**, and the road is long. We must always bear in mind what the people want, share **weal and woe** with them, and we must work together with them diligently for the public good and for the expectations of history and of the people.

fortress ['fɔ:tris]
n. 堡垒

arduous ['ɑ:dʒʊəs]
a. 艰巨的；困难的

weal and woe [wi:l] [wəʊ]
祸福，甘苦

Match the English expressions in the left column with their corresponding Chinese versions in the right column. Write down the letter before each number.

60-year-old Wang Yongzhi was the Chief Engineer. 59-year-old Qi Faren was the Chief Spacecraft Engineer. The two have been among the most brilliant young scientists working on the Two Bombs, One Satellite project. Now they were facing the greatest challenge of their lives. They were guiding the latest generation of young scientists into a new era.

Segment 2

After 590 seconds, space welcomed its first Chinese visitor, Yang Liwei. 21 hours and 23 minutes later, after orbiting the Earth 14 times, Shenzhou-5 returned. Yang had completed humanity's 241st trip into space. China had become the third country in the world to launch a human being into orbit.

Segment 3

Since 1956, several generations of space flight engineers have devoted their time, effort, and knowledge to achieving the dream of navigating heaven. China's manned space flight program is continuing to progress steadily towards its goals.

Role-play

After Fan Jinshi received the “100 People Who Touched China” award, she was surrounded by reporters. Now work in groups of four to five to act out the interview. One of you will be Ms. Fan, and the others will be reporters. Before the role-play, spend some time brainstorming what questions to ask and how Ms. Fan would answer them. (You may use information from the Text and other sources.)

大学资料部公众号：大学资料部

Tips:

You may wish to cover the following points in the interview:

- Different stages of Ms. Fan's life (e.g., her college days, her internship at Dunhuang, her career, her activities after retirement...)
- The reasons why she is devoted to Dunhuang (e.g., her love for its art and history, the influence of Chang Shuhong and other older colleagues, the importance of Dunhuang in Chinese history and culture...)
- The Digital Dunhuang project (What is this project about? Why is it necessary? How is it progressing? How has it been received?)

In this unit, we came across several people who have touched China. Now write a paragraph about another such person that you know of. It might include the following points:

- 1) the name of the person;
- 2) what this person did that moves you;
- 3) what change(s) you have made after learning about this person.

When you finish, please exchange your writing with a classmate and evaluate each other's writing according to the following criteria:

Evaluation criteria:

- 1 You must write a paragraph of no less than 120 words.
- 2 You must explain what this person did clearly.
- 3 You must point out how this person moves you.
- 4 You must use:
 - five key words and expressions from the text,
 - two new words from the other two articles.

Highlight these words and expressions clearly by underlining them or using a different color.

Upon completion of this unit, you are expected to:

- have a thorough understanding of the text contextually and linguistically;
- build up an active vocabulary to talk about the people who have touched China and know how to use the key words and expressions in context properly;
- get inspired by the people who have touched China and consider what you can do for our country;
- role play an interview with Fan Jinshi to understand her life and commitment better;
- write a well-developed paragraph on another person who has touched China.

Gu Fangzhou (顾方舟)	the father of a new type of pill used in eradicating polio from China
Su Bingtian (苏炳添)	the first Chinese sprinter to compete in the men's 100-meter sprint final at the Olympic Games

Yang Zhenning/C. N. Yang (杨振宁)	the first Chinese-American scientist who applied to return to China when travel between the two countries became possible in 1971
Ye Jiaying/Yeh Chia-ying (叶嘉莹)	Chinese classical poetry master, admired for drawing wider attention to its beauty
Zhang Guimei (张桂梅)	the founder of China's first full-tuition-free high school for girls
Zhu Yanfu (朱彦夫)	the only survivor of his company at the Battle of Lake Changjin during the War to Resist US Aggression and Aid Korea

1. For decades, the American Dream has inspired individuals to pursue their dreams through sacrifice, risk-taking, and hard work. The American Dream is shared by thousands of immigrants from all over the world who hope to improve their lives through the pursuit of their individual dreams.

The Chinese Dream has been defined very differently as the dream of “the great rejuvenation of the Chinese nation.” Rather than celebrating individual aspiration and striving, the Chinese Dream emphasizes a collective effort from all Chinese people in gradually achieving China’s yearning for a “great rejuvenation” in the 21st century.

While both dreams hope for success through hard work, the American Dream stresses the spirit of freedom and social mobility, while the Chinese Dream (although it

incorporates individual dreams) pinpoints unity and stability. Also, the Chinese Dream is unique to the Chinese people. Unlike the American Dream, it speaks only to the members of the Chinese nation and is not meant to be adopted by the world.

It's inappropriate to argue which dream is "better." Different cultures have cultivated different values, beliefs and political cultures, which cannot be judged by a single standard. Obviously, the Chinese Dream is different from the American Dream, but that does not necessarily lead to an inevitable clash between these two dreams or even these two states and cultures. In fact, their very differences might make it possible for the two to co-exist. "Seeking common ground while reserving differences" is a core value and principle of China's culture and its foreign

policy as well, and it certainly is a core value that is deeply embedded in the idea of the Chinese Dream.

Some conclusions can be reached from the different responses of the two peoples towards their national dreams. Compared with the Americans, the Chinese people take national pride more seriously: they feel greater personal satisfaction because they see brighter prospects of improvement in the future. They hold a stronger belief that realization of the Chinese Dream will improve their own lives and the power of the nation. That shows they are more confident about their personal future and the future of the nation.

“从内心深处我真想长期留在这里，永远留在这里。”杰出的语言学家和佛教研究者季羨林在他的《在敦煌》一书中谈到莫高窟时写道。“现在就让我把自己的身躯带走，把心留在敦煌吧。”

(Para.1)

大学资料都在公众号：大学资料

季羨林不是第一个也不是最后一个对莫高窟着迷的人。莫高窟现被联合国教科文组织列为世界文化遗产。它位于丝绸之路甘肃省段的一个战略要地，共有洞窟735个，全都是在悬崖峭壁上开凿出来的，洞窟里有彩雕、壁画和佛教经文。公元366年，僧侣们开始兴建莫高窟。随着时间的推移，这里成为佛教信徒、商人和其他旅行者的聚集地，但在元朝之后，莫高窟逐步走向衰落，直至湮没无闻。直到20世纪初，这些洞窟才

被重新发现。从那时起，它们再次引起了人们的注意。一些著名学者和画家来莫高窟参观并对其进行研究。有些人甚至毕生致力于保护和传承石窟艺术。其中，常书鸿和樊锦诗是这种倾情投入的两个光辉典范。

(Para.2)

大学资料都在公众号：三石学堂

青年常书鸿抱负远大，在法国的顶级艺术学校学习，其油画作品在20世纪二三十年代多次获奖从而声名鹊起。但是在他偶然看到一本关于敦煌石窟的书后，不久一切都变了。他惊异地发现中国有这样一个长期鲜为人知的艺术宝库。他在那一刻和敦煌的缘份已定。

(Para.3)

常书鸿回到中国，帮助建立了一个研究敦煌石窟艺术的机构。**1943**年，他和他的团队抵达敦煌，却发现他们资金短缺，当地条件简陋不堪。他们不得不在寺庙里工作，住在马厩里，喝着带咸味的浑水，吃的是硬邦邦的饼和白水面条。然而，常书鸿在给妻子的信中写道：“受这些苦值得！岂止值得！从看到它的第一眼起，我心里就想：哪怕以后我死在这里也心甘情愿。”此后多年，他和同事们一起探查文物、临摹壁画、对洞

窟进行编号，就这样系统而细致地研究和保护敦煌的宝藏。

樊锦诗紧随常书鸿的脚步，她将一生献给莫高窟保护事业而闻名遐迩，被誉为“敦煌的女儿”。她卓越的工作成果为她赢得了多个国家级荣誉，包括“100位感动中国人物”奖和“文物保护杰出贡献者”奖。樊锦诗生于北京，长于上海，毕业于北京大学考古专业，1963年作为实习生第一次来到敦煌。“要说呆在敦煌我没有犹豫过，那是假话。敦煌和北京、上海相比，那是两个世界。”樊锦诗承认。然而，那些古代艺术品的美彻底征服了她。

(Para.5)

樊锦诗在没有电的情况下进行了大量的研究工作，直到20世纪80年代条件才稍有改善。经过艰苦卓绝的努力，她确定了众多石窟的建造朝代。后来，她先后担任敦煌研究院的副院长和院长，负责遗址规划、科学研究、环境监测和风险管控以及游客管理。她看到风化侵蚀加快和游客过量参观对遗址保护构成严重挑战。她说：“壁画文物不可再生，也不能永远保存下去。”她在文物数字化保护和文化遗产可持续利用方面不断努

力创新。现在，敦煌游客中心已经投入使用，在接待游客的同时缓解对石窟的压力。樊锦诗还启动了数字敦煌项目，利用最先进的技术为所有彩塑和壁画建立数字资源库。“尽管我们努力减少损坏，但我们无法完全阻止它们免遭侵蚀。然而数字数据库将永久保存下去。”她说。（Para.6）

事实上，正是由于常书鸿、樊锦诗及其同事们这一批敦煌守护人的终生奉献和个人牺牲，莫高窟将得以在未来很长一段时间内继续惊艳世界。

中国铁路之父詹天佑

亚历克斯·科尔维尔

2022年冬奥会期间，京张高速铁路上子弹头动车飞驰，在两个主办城市之间运送运动员和游客，吸引了全世界的目光。了解情况的人在惊叹中国最近在铁路建设和自动化方面取得的成就同时，不禁想起中国铁路之父詹天佑。他主持修建的最早的京张铁路于1909年建成。在中国的所有铁路线中，这是首条不借助西方列强援助由中国人独力建造的铁路线。

(Para.1)

中国最早的铁路线是由西方列强建造的，目的是为了瓜分中国。加之蒸汽火车噪声很大，使中国人对铁路极其不信任。很少有中国人对铁路感兴趣，更不用说学习如何建造铁路了。詹天佑却不以为然。

(Para.2)

詹天佑天资聪颖，小时候人们就经常看到他钻研和摆弄钟表及船舶模型。1872年，12岁的他被清政府选中前往美国学习西方技术。在那里，他上高中时数学成绩优异，20岁便从耶鲁大学土木工程学专业毕业，所学侧重铁路建设。他认为铁路是实现中国现代化的关键。然而，他回到中国后却没能在铁路部门找到工作。

(Para.3)

直到七年之后，詹天佑才在一位朋友的推荐下去一名英国工程师手下工作，在中国北方修建一条新铁路。他在中国第一座铁路桥滦河铁桥等几个项目中成绩卓著，其能力很快获得认可。

(Para.4)

詹天佑最伟大的成就还在后面：修建连接北京和重要贸易城市喀尔干（今张家口）的铁路。起初，两个西方政府拼命争夺该项目的主办权，但都没得逞。最后，他们不得不让中国人自己来干。虽然这条铁路全长只有201.2公里，但跨越崇山峻岭，还要从八达岭长城下方穿过。在他被委以该项目总工程师之前，乃至其后，许多外国人质疑中国工程师是否有能力在如此复杂的环境中修建铁路。詹天佑承受着巨大的压力。他后来

写信给他的美国老师说：“如果京张工程失败的话，不但是我的不幸、中国工程师的不幸，同时会给中国带来很大损失，因为中国工程师今后就不会再被信任了。”然而他决心排除万难，勇往直前。

(Para.5)

为了克服陡峭山坡的爬坡困难，詹天佑发明了人（之）字形爬坡铁路展线，采用“双机牵引”，就是火车驶入陡坡后，使用两个火车头，一个在前面拉，另一个在后面推。为了加快长隧道的建造速度，他在中段钻了竖井，让工人从两端同时对凿。结果，詹天佑于1909年完成该项工程，工期提前两年，只用了五分之一的预算。

（Para.6）

尽管他的名气越来越大，但詹天佑心知，他做工程师会更自在。他极力倡导培养和使用中国的铁路技术人才。詹天佑担任汉粤川铁路会办时，一位德国总工程师问他，能否用德国工程师代替不称职的中国工程师。詹天佑回答说，如果中国工程师真的不行，可以替换，但为了国家的利益，中国工程师需要学习铁路建设。

(Para.7)

詹天佑于1919年去世，享年58岁。他最后的安息之地在青龙桥火车站，京张铁路在这里穿越长城下方。其时，他的成就已经得到了国内外的认可。他当选英美两国著名工程师学会的会员。

(Para.8)

与中国今天卓越的工程壮举相比，詹天佑的成就似乎很有限。在他修建的京张铁路上，火车每小时行驶速度仅为35公里，而今天的子弹头动车时速可达350公里。但詹天佑的事业标志着中国人民迈出了第一步：改变观念，持续创新，全力以赴，并最终使国家走上发展快车道。

(Para.9)

走上小康之路

杜超（音译）

在“感动中国”2020年度人物颁奖典礼上，一位脊背微驼但面部表情坚毅的男子走到聚光灯下。八天后，他在北京举行的一次盛会上荣获“全国脱贫攻坚楷模”称号。这位男子就是来自重庆的62岁的毛相林。他在几天内两次成为万众瞩目的焦点，但过去二十多年来，他一直是一位无名英雄，带领穷乡僻壤的乡亲们披荆斩棘，开辟出了一条通往美好生活的道路。

（Para.1）

毛相林所在的下庄村地处大山深处的谷底，四周被数百米高的绝壁合围。那里的生活极其艰苦。

(Para.2)

大学资料都在公众号：三号教学楼

1997年，时年38岁的毛相林当选村委会主任，变化随之而来。他召集村民开会，提议大家自己动手修建一条通往外部世界的道路。然而，他的建议遭到了反对。毛相林几经努力，用耐心和诚意说服了400名村民。最后，大家达成一致，自筹资金修路。

(Para.3)

这一年晚些时候，大约有**100**名村民卷起了袖子，准备大干一场。在毛相林的带领下，白天，他们钻炮眼，安放炸药雷管，搬运石头；晚上，他们睡在山洞里，腰上栓根保险绳，保险绳的另一端系在岩石缝里长出来的大树上。年复一年，他们辛苦忙碌了整整七年。**2004**年3月，他们终于在悬崖绝壁上凿出一条两米宽、八公里长的道路。这不只是一条路，它是摆脱贫困的梦想得以实现的开端。

(Para.4)

随后，毛相林开始思考还能做些什么来为村民们创造更加美好的生活。在走访了附近的村庄并征求农业专家的意见后，他鼓励村民们种植柑橘、芝麻、小麦、西瓜和南瓜。年轻的村民们甚至更进一步，上网销售他们种植的农产品。一种以水果为主体、多种经济作物同步发展的新农业模式出现了。几年下来，该村在这种模式下日渐兴旺。2020年，村民的人均可支配收入达到13,000元以上，是修路前的40多倍。

(Para.5)

村里的情况不断改善。毛相林带领村民利用当地政府提供的资金，翻修并拓宽了道路。一个新的经济繁荣蓝图随之在该村展开。毛相林说：“我们从三方面把乡村旅游做起来。首先，我们翻新了一些农舍，改造成民宿。第二，我们建立了一个小型陈列馆，向游客弘扬自力更生精神。第三，我们加大了水果种植上的投资，还可组织水果采摘游。”

(Para.6)

毛相林践行了他对村民们的承诺。在他的领导下，全村总共有96户人家脱贫。毛相林相信，只要肯奋斗，人人都能过上幸福的生活。

人民对美好生活的向往，就是我们的奋斗目标¹

2012年11月15日

我们的民族是伟大的民族。在五千多年的文明发展历程中，中华民族为人类文明进步作出了不可磨灭的贡献。近代以后，我们的民族历经磨难，中华民族到了最危险的时候。自那时以来，为了实现中华民族伟大复兴，无数仁人志士奋起抗争，但一次又一次地失败了。中国共产党成立后，团结带领人民前仆后继、顽强奋斗，把贫穷落后的旧中国变成日益走向繁荣富强的新中国，中华民族伟大复兴展现出前所未有的光明前景。

(Para.1)

¹ 这是习近平在十八届中央政治局常委同中外记者见面时讲话的主要部分。

这个重大责任，就是对人民的责任。我们的人民是伟大的人民。在漫长的历史进程中，中国人民依靠自己的勤劳、勇敢、智慧，开创了各民族和睦共处的美好家园，培育了历久弥新的优秀文化。我们的人民热爱生活，期盼有更好的教育、更稳定的工作、更满意的收入、更可靠的社会保障、更高水平的医疗卫生服务、更舒适的居住条件、更优美的环境，期盼孩子们能成长得更好、工作得更好、生活得更好。人民对美好生活

的向往，就是我们的奋斗目标。人世间的一切幸福都需要靠辛勤的劳动来创造。我们的责任，就是要团结带领全党全国各族人民，继续解放思想，坚持改革开放，不断解放和发展社会生产力，努力解决群众的生产生活困难，坚定不移走共同富裕的道路。

(Para.3)

人民是历史的创造者，群众才是真正的英雄。人民群众是我们力量的源泉。我们深深知道，每个人的力量是有限的，但只要我们万众一心、众志成城，就没有克服不了的困难；每个人的工作时间是有限的，但全心全意为人民服务是无限的。责任重于泰山，事业任重道远。我们一定要始终与人民心心相印、与人民同甘共苦、与人民团结奋斗，夙夜在公，勤勉工作，努力向历史、向人民交出一份合格的答卷。

(Para.4)

人的一生只有一次青春。现在，青春是用来奋斗的；将来，青春是用来回忆的。人生之路，有坦途也有陡坡，有平川也有险滩，有直道也有弯路。青年面临的选择很多，关键是要以正确的世界观、人生观、价值观来指导自己的选择。无数人生成功的事实表明，青年时代，选择吃苦也就选择了收获，选择奉献也就选择了高尚。青年时期多经历一点摔打、挫折、考验，有利于走好一生的路。要历练宠辱不惊的心理素质，坚定百折

不挠的进取意志，保持乐观向上的精神状态，变挫折为动力，用从挫折中吸取的教训启迪人生，使人生获得升华和超越。总之，只有进行了激情奋斗的青春，只有进行了顽强拼搏的青春，只有为人民作出了奉献的青春，才会留下充实、温暖、持久、无悔的青春回忆。

Fan Jinshi: The Daughter of Dunhuang

The Mogao Caves near Dunhuang in western Gansu Province boast the world's largest and best-preserved treasure trove of Buddhist art, known as “the Pearl of Oriental Art”.

In 1962, archaeologist Fan Jinshi visited the caves for the first time as a Peking University undergraduate. For Fan Jinshi who grew up in Shanghai, a moment of excitement was too fragile to support her in staying in this desert. Salty water, oil lamps, mud shacks, earthen beds, and swirling sands. Life was extremely harsh there.

But Fan secretly withheld the letter. She insisted on staying because of the artistic treasures inside the caves and her dream of studying national cultural heritage.

In 1974, Fan Jinshi joined the Communist Party of China, becoming even more determined to protect national cultural heritage. The Mogao Caves were officially open to tourists in 1979,

whereupon the murals and artifacts began to decay, were damaged, or even disappeared. Faced with the incompatibility of conservation and tourism, Fan knew that a compromise had to be found.

In the late 1980s, Fan came up with the idea of digitizing Dunhuang for the purpose of permanently preserving the murals, painted sculptures and historical data. In 2016, Digital Dunhuang was formally launched online, enabling people around the world to enjoy clear panoramic images of the caves.

Now the Honorary Director of Dunhuang Academy, 84-year-old Fan Jinshi is as busy as ever, still toiling to conserve and manage the caves.

Fan Jinshi has melded her mission her generation shouldered for the nation and the spirit of a qualified Communist Party member to sustain her lifetime in the desert. “Let this be my epitaph,” she says, “I’ve done all I could for Dunhuang.”

Zhang Guimei: Changing Future of Rural Girls Through Education

The woman is named Zhang Guimei, who was listed as one of the top 10 people that moved China in 2020 by China Central Television, and a national outstanding member of the Communist Party of China (CPC).

In 2002, Zhang was a rural teacher. Seeing the backward and unequal distribution of educational resources in China's poor mountainous areas, she vowed to build a free senior high school for girls in the mountains, so to offer them education and a possibility to go to the world beyond the mountains.

However, in half a year after she established the school, nine of its 17 teachers resigned because of the poor conditions. Six out of the eight remaining teachers were Party members.

From that day on, Zhang Guimei, together with other teachers, as well as the students, went all out.

Three years later, all 96 students of the school's first intake were admitted to universities. Zhang, together with the rest of the teachers, helped 1,804 girls change their fate with knowledge by 12 years of perseverance.

Segment 1

The Two Bombs, One Satellite project that had progressed throughout the 60s and 70s gave China confidence in its abilities in the field of science. It also fueled the popular imagination that the country would venture into the space. In September 1992 China officially launched its manned space flight program. The greatest and the most technically challenging project in China's space program was under way. 60-year-old Wang Yongzhi was the Chief Engineer. 59-year-old Qi Faren was the Chief Spacecraft Engineer. The two have been among the most brilliant young scientists working on the Two Bombs, One Satellite Project. Now they were facing the greatest challenge of their lives. They were guiding the latest generation of young scientists into a new era. (English subtitles: Human space flight is a high-tech field. China couldn't be left out. The government decided that it was worth opening the treasury to make it happen.)

Segment 2

And so China began building its own manned spacecraft, the Shenzhou. In late autumn 1999, an unmanned test launch of Shenzhou-1 was conducted at the Jiuquan Satellite Launch Center. Jiuquan became the world's third site to conduct manned space flight launches after the Baikonur Cosmodrome in Kazakhstan and the Kennedy Space Center in the US. On November 20th, 1999, Shenzhou-1 left the Earth's atmosphere. With its successful return 21 hours later, China marked a major breakthrough in its manned space flight program. The launch of Shenzhou-1 was the fruit of nearly a decade of intense effort by more than 110 academies, 3,000 supporting companies and institutions, and 100,000 people. Soon after that first launch, preparations began for a manned space flight. On October 12th, 2003, astronauts Yang Liwei, Zhai Zhigang and Nie Haisheng arrived at Jiuquan. Two days later, ten hours before the launch, Yang Liwei was

notified that he had been selected to pilot Shenzou-5. It was a historic moment. After 590 seconds, space welcomed its first Chinese visitor, Yang Liwei. (English subtitles: Greetings to the people of every nation on Earth.) 21 hours and 23 minutes later, after orbiting the Earth 14 times, Shenzhou-5 returned. Yang had completed humanity's 241st trip into space. China had become the third country in the world to launch a human being into orbit.

Segment 3

That year, Qian Xuesen, the man known as the Father of China's Space Program, was 92 years old. It was 50 years since he first proposed sending someone into space. In 1967, Qian had coined the Chinese word for space flight, *Hang Tian*, navigating heaven. Since 1956, several generations of space flight engineers have

devoted their time, effort, and knowledge to achieving the dream of navigating heaven. (English subtitles: I've exited through the hatch. It feels great. This ball of water is like an optical lens. Look at it, and you can see my reflection.) China's manned space flight program is continuing to progress steadily towards its goals. Spaceships, space suits, space stations, space-grown food, technologies that used to seem unachievable have now been developed in China. China has become a spacefaring nation.

*Tips for your reference***1. Introduction**

Introduce the person briefly: their name, title, and major contribution.

(e.g. Yuan Longping was an agricultural scientist known as the “father of hybrid rice”).

2. Explain the reasons and give examples.

2.1 Explain why they are significant and how they touched China.

(e.g. His pioneering research helped transform China into a major rice producer and ensured greater food security for its massive population.)

2.2 Provide 1–2 key examples that demonstrate their impact.

(e.g. During the 1970s, Yuan developed higher-yielding and more resilient strains of rice that transformed China into a major rice producer.)

(e.g. By the 1990s, around 60% of rice in China used his hybrid strains.)

3. Conclusion

Conclude by re-stating their overall importance.

(e.g. Yuan Longping's work of developing hybrid rice greatly advanced China's agriculture and food supply.)

4. Keep the paragraph concise: aim for 4–5 sentences.

Focus on the most essential facts and details.

I well remember how impressed I was when I first came across the work of Professor Ye Jiaying. Here was a scholar who not only wrote of the wonders of traditional Chinese poetry, but who stood out as an accomplished poet in her own right. She showed a talent for producing some remarkable poems when she was just fifteen years old. Over a long lifetime — she is now 98 — she has made a name for herself as someone who has richly enhanced (增进) the appreciation (欣赏) of our cultural heritage. For many years she sought to spread this appreciation overseas, teaching for many years in Canada, but in 1979 she returned home to China, seeking to inspire a new generation to keep in touch with its roots. As she wrote, “For the heart of lotus (莲芯) would not die; A thousand years later it shall bloom and thrive.”
